Phone-:

EEG & BRAIN MAP ANALYSIS

Patient No : 6008

Name : Biswajit Boro

Address : Psy, OPD

Date : 01/10/2024 13:01:59

Age : 24 Years (M)

Consult :

Last Meal :

Cooperation :

Medication :

Last Attack :

Handedness :

History :

Observation :

The background activity is symmetrical consists of 8-10 Hz, 30-40 microvolts of alpha activity arising from both the occipital areas and getting attenuated by eye opening. Alpha is mixed with anterior dominant fast activity.

Spontaneous record shows no focal or generalised spike, sharp wave, spike and wave seizure discharges or slow waves. provocation with photic stimulation and hyperventilation did not contribute to any abnormality.

Impression :

Normal awake record.
